

# Bengi – The Bench \*

KONTAKT

[hello@mifactori.de](mailto:hello@mifactori.de)

A bench built mostly from already existing Triikka parts. Comfortable, modular, transformable. Currently only available as [local make](#).

We build two versions for this shooting.

1

A version built with thick slats and short connecting beams.

2

And a version built with thinner material for the slats using longer connecting beams.

Frame construction ↓

Remarks

- Bengi uses parts from [Addi the chair](#).
- We also experimented with adding boards on the bottom of the bench to create storage for shoes or something else. But we wanted to add the bench to the Triikka catalog and could not find a part that fits in an elegant way. Let's see how the catalog grows.
- In our functional prototypes we use wing nuts. But you can of course replace them with more elegant or cheaper nuts.
