

Felix the stool

KONTAKT

hello@mifactori.de

Felix the stool is a design for Triikka. It is for kids and consists of modular parts that can be creatively reused for playing or for organising the children's room.

At present it is not produced and cannot be bought anywhere. But it is quite easy to make. Just follow the documentation of the parts shared below.

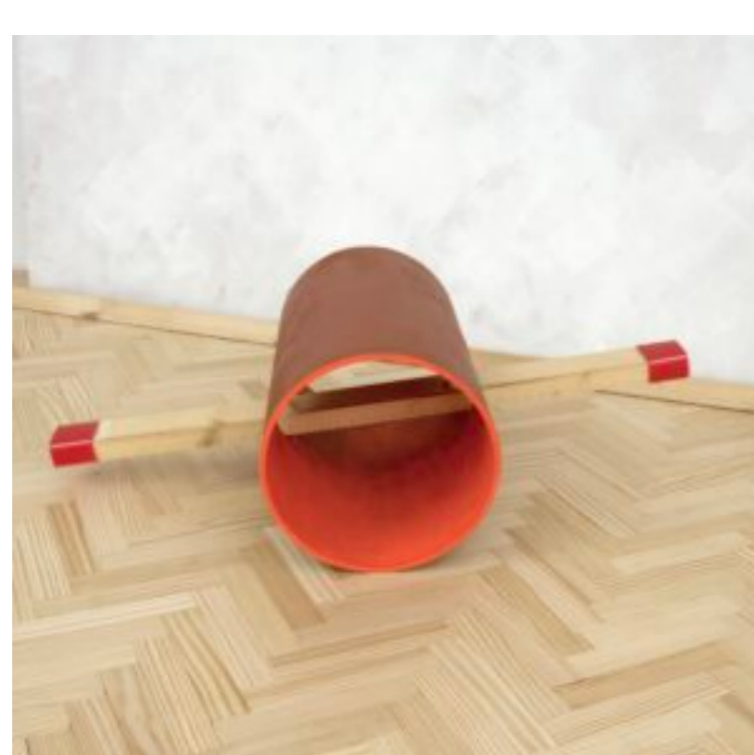

This post shares a functional prototype and some color studies.

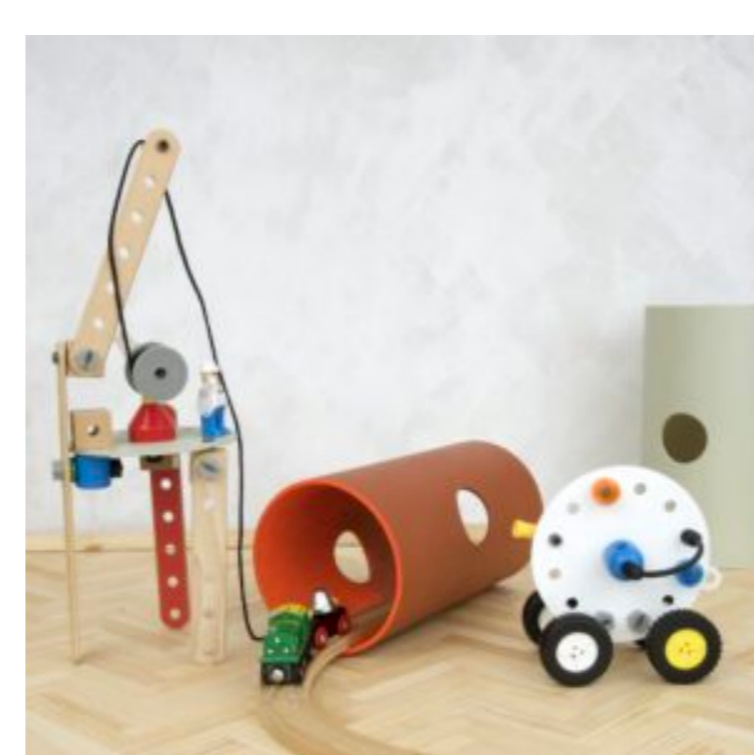

a tunnel

a tunnel

balance board

disks compatible with common construction toys

The parts are usable for all kinds of interesting sport or construction activities.

We have a couple more use cases for this part in stock. So [stay tuned](#) for more.

These spacers seen here as wheels are also used in [Addi the chair](#).
