

Marigal *

Marigal is a french cleat like shelving/wall storage solution using [Trikka parts](#). It is a result of experiments ran our intern Manuela Sauer. This solution can be done with many different parts and is possible in many configurations. We documented here just two versions.

The Triikka solution can't be bought somewhere (except as [local make](#)). But it is easy to make. Here are a few more more pictures and remarks:

Pic 8. Click on image to enlarge.

Howto

- Just screw slats on to the wall using a spacer.
- The solutions uses a slat vertically to avoid bending down.
- Depending on the thickness of your chosen slats you'll need spacers to make up for the distance to the wall. This can also be washers. (See "Pic 8") above.
- As stated above: It is basically a technical solution that can easily be adapted to different locations, use cases and available parts.
