

Midlinging

CONTACT

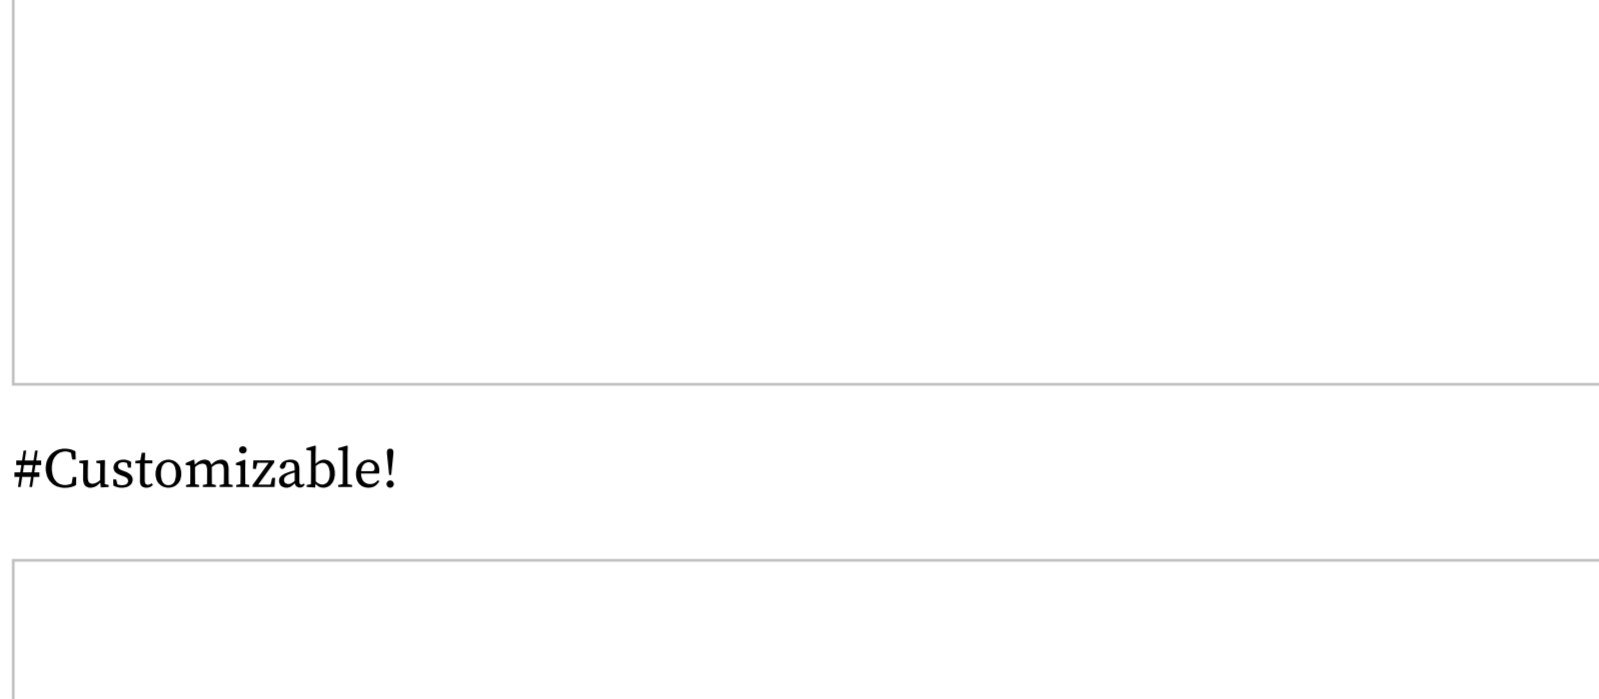

hello@mifactori.de

Midlinging is a bed for kids created for the [Circular Design project Ikego](#). It is suited for a **standard slatted frame** measuring 700x1400mm and a **standard mattress** with the same dimensions. The slatted frame is not part of the model but fits perfectly in it. Midlinging was developed as a **B-model** to the bench [Shouidhou](#).

Shots:

#Customizable!

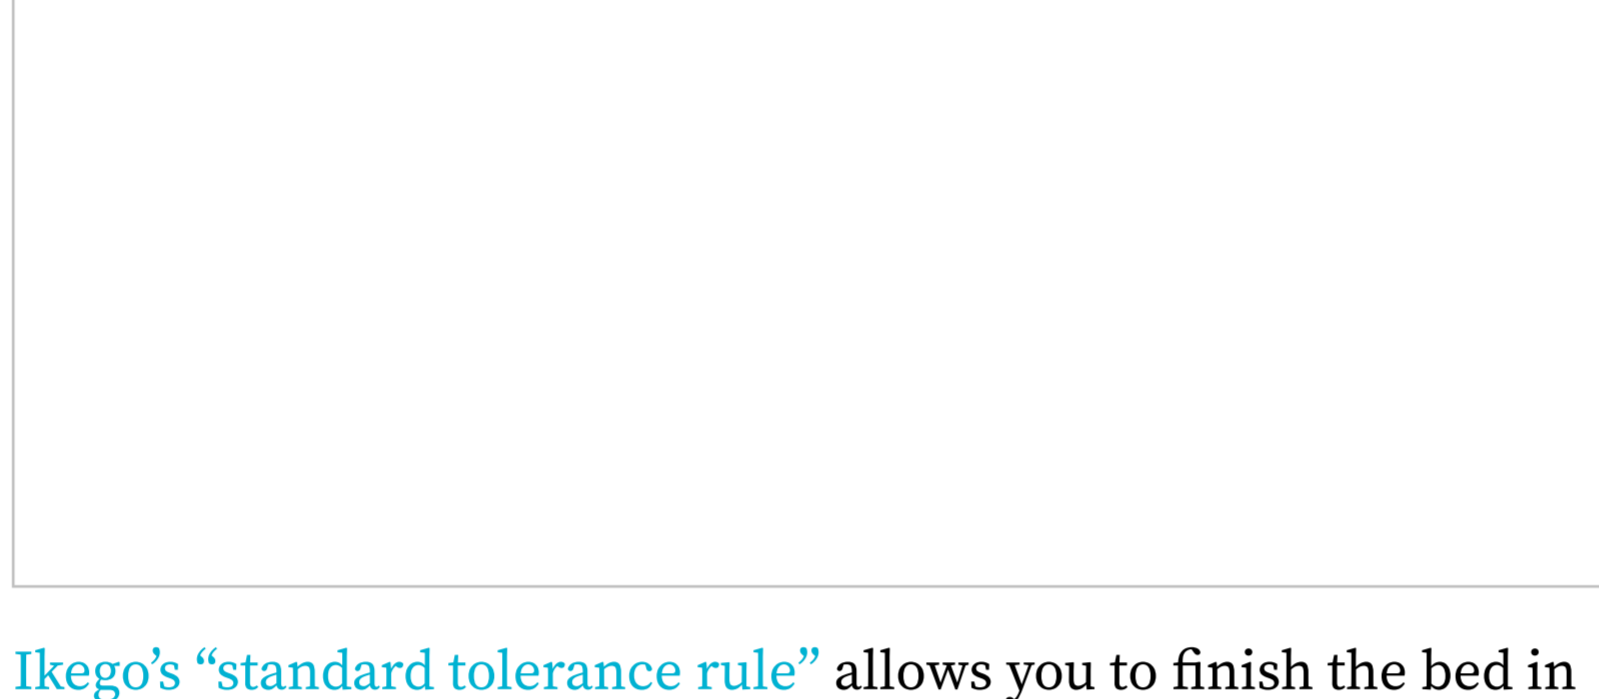

Ikego's "standard tolerance rule" allows you to finish the bed in the **colours, materials and shapes you like**. And the additional holes allow you to attach all kinds of decorations or practical items such as bookshelves, sideboards and so on.

#aesthetics #B-model

The parts in this model were made for a bench [Shouidhou](#) and aesthetically fit the bench. If we had made them for this bed, they would have looked different. Maybe we'll add a render with aesthetic ideas at some point? Perhaps you would like to help?

Good night!

)

Ikego info:

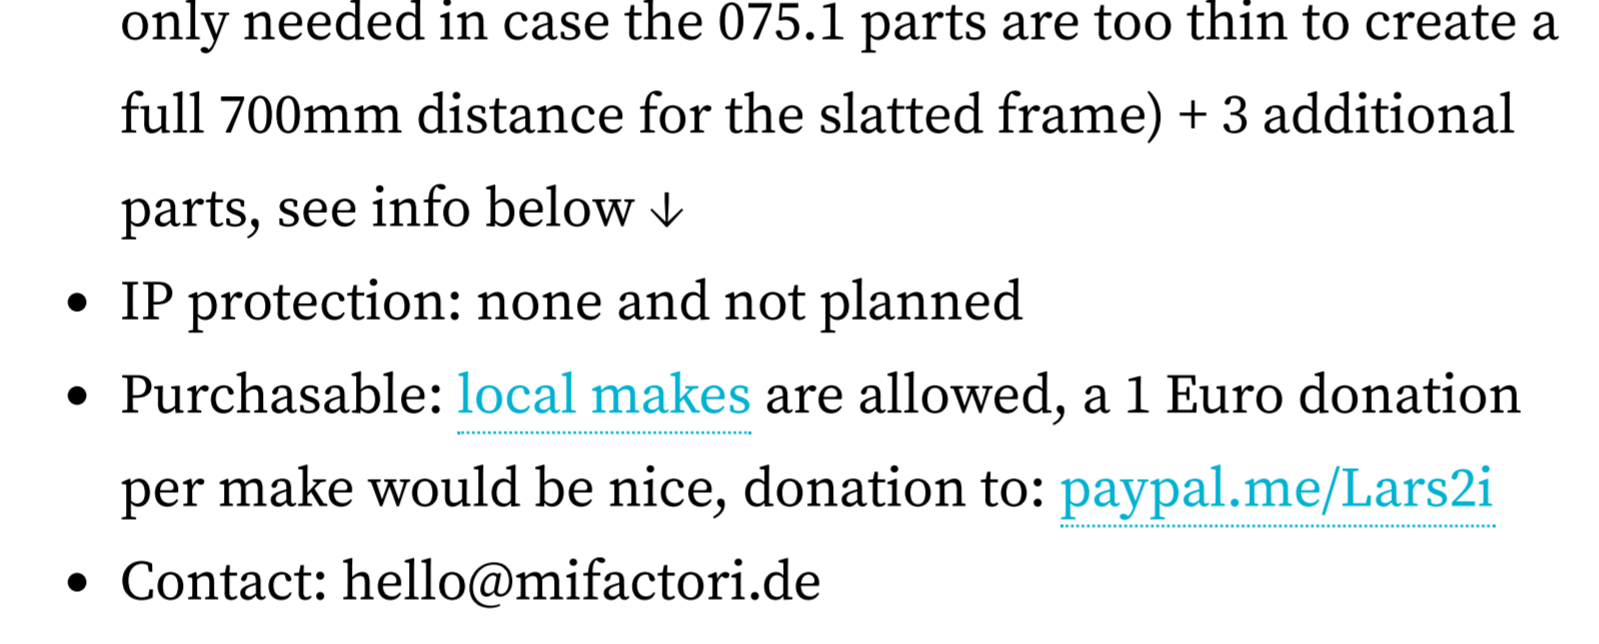

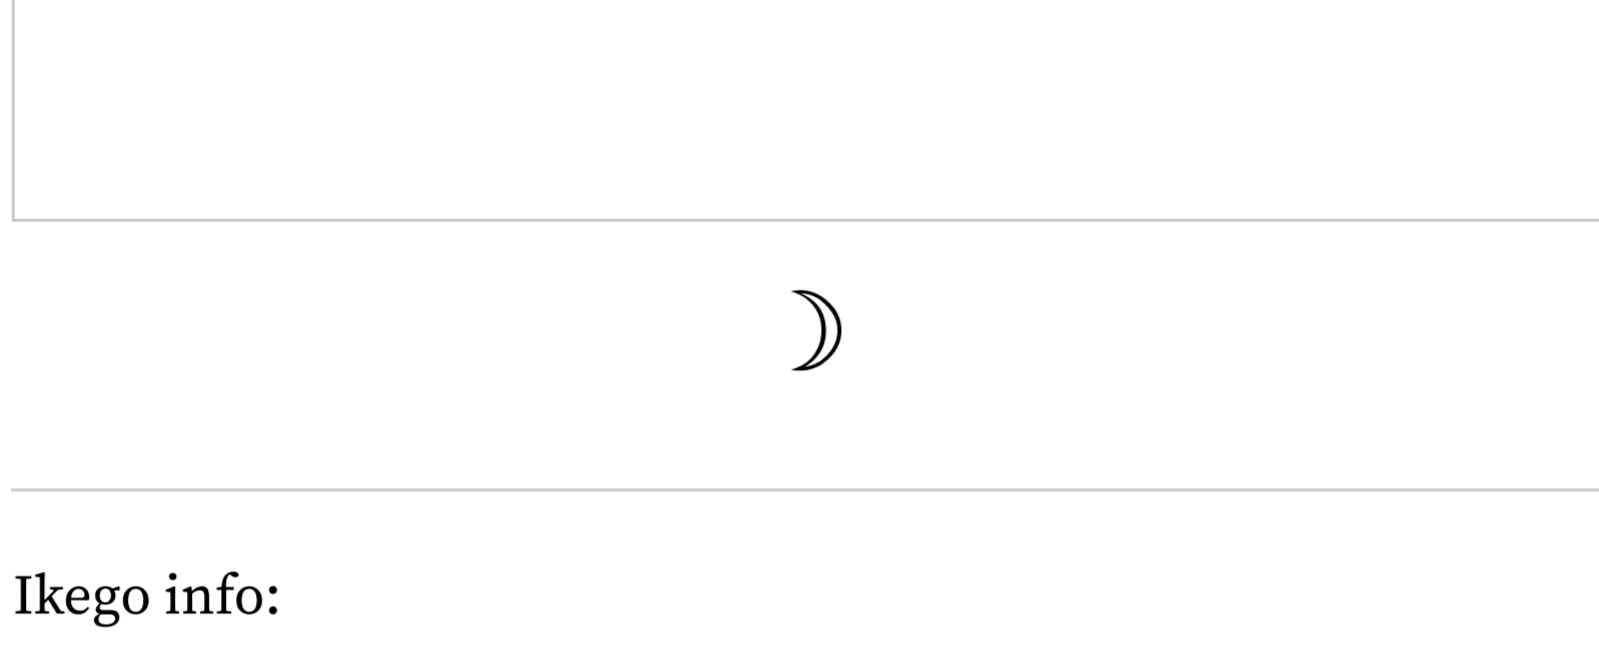

- [Ikego parts](#) used: [094.3](#), [082.3](#), [075.1](#), [072.1](#) (the spacer is only needed in case the 075.1 parts are too thin to create a full 700mm distance for the slatted frame) + 3 additional parts, see info below ↓
- IP protection: none and not planned
- Purchasable: [local makes](#) are allowed, a 1 Euro donation per make would be nice, donation to: paypal.me/Lars2i
- Contact: hello@mifactori.de

Parts added with this model:

*

1

Big board

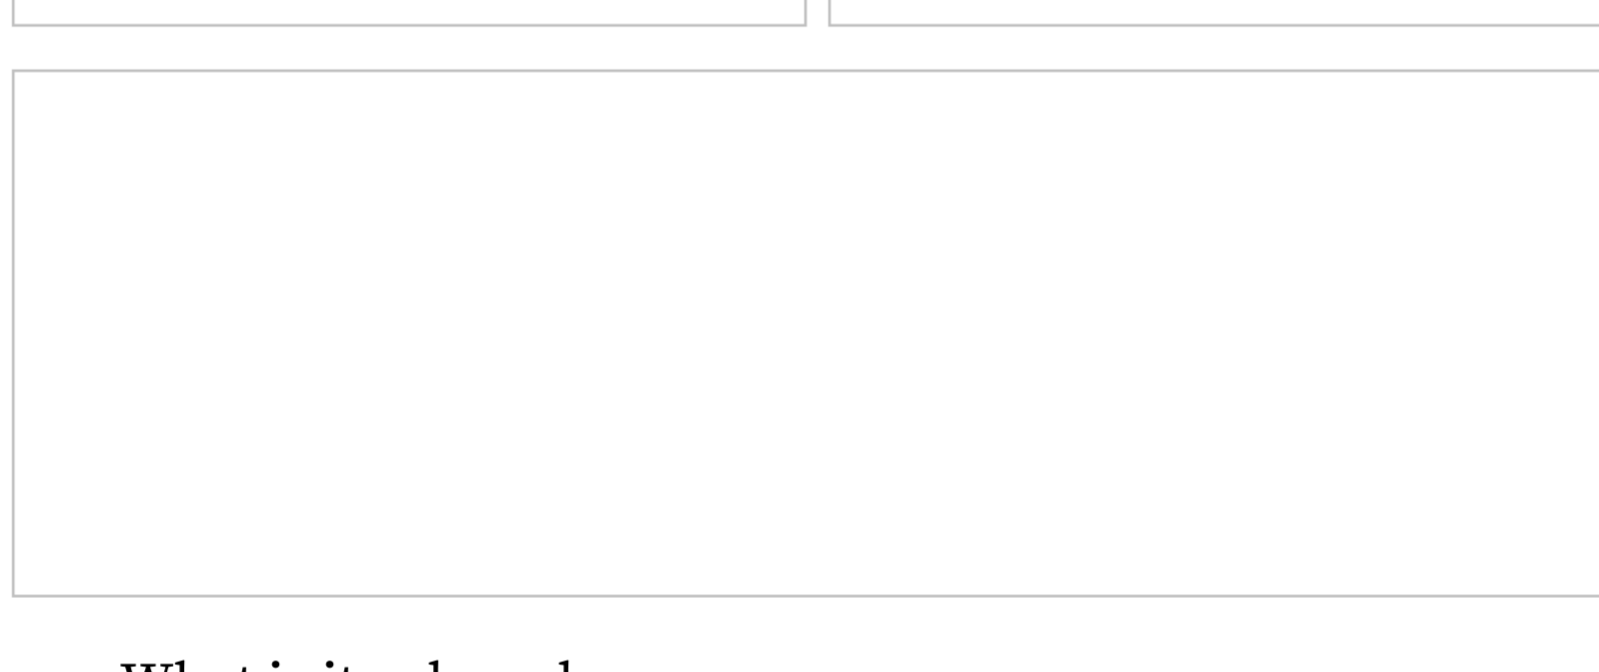

- What is it: a board
- Material: strong | [standard tolerance](#)
- Dimensions: ~1590x330x16mm | [standard tolerance](#)
- Holes: [Ikego grid](#), 10 holes ø 6mm, for hole distribution see drawing
- Buy: Available as local make
- Open: We share this part under [IPP 1.0](#)

*

2

210mm rod

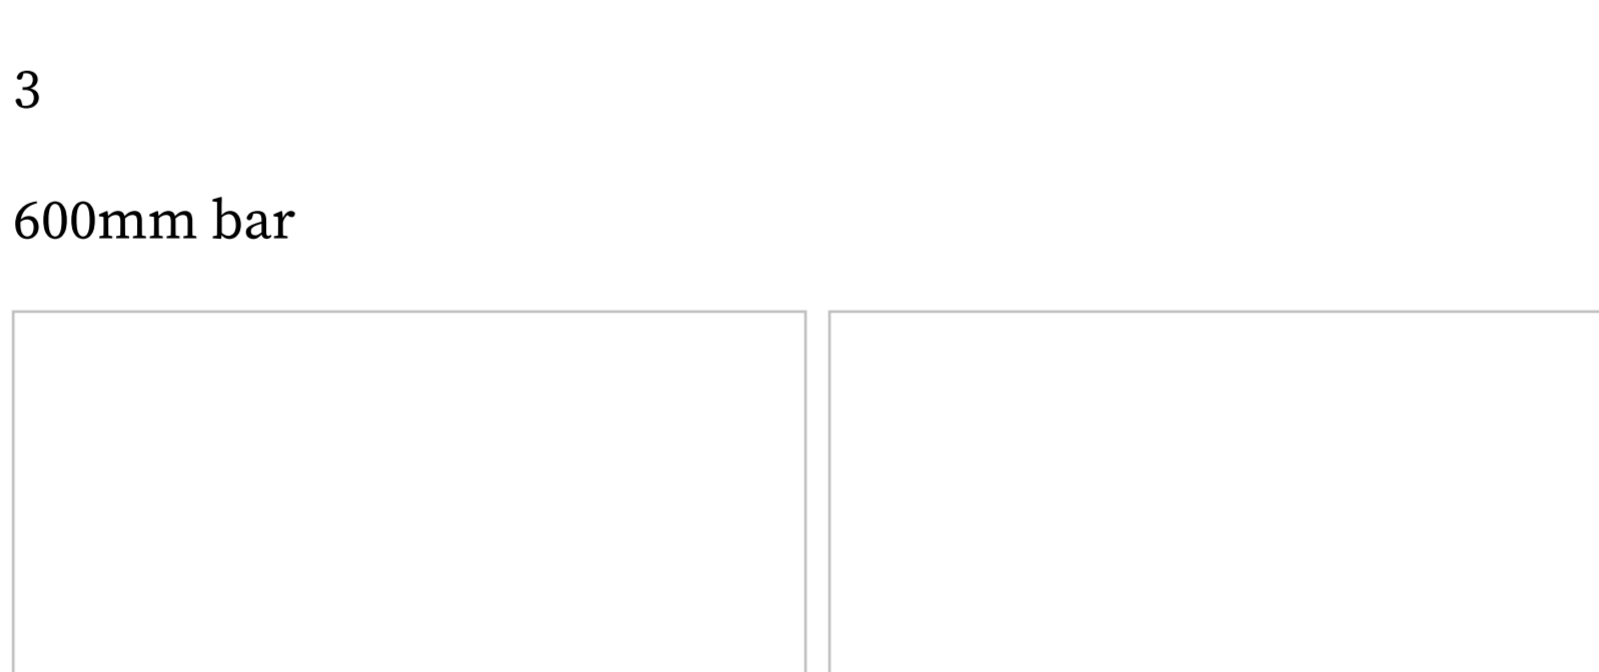

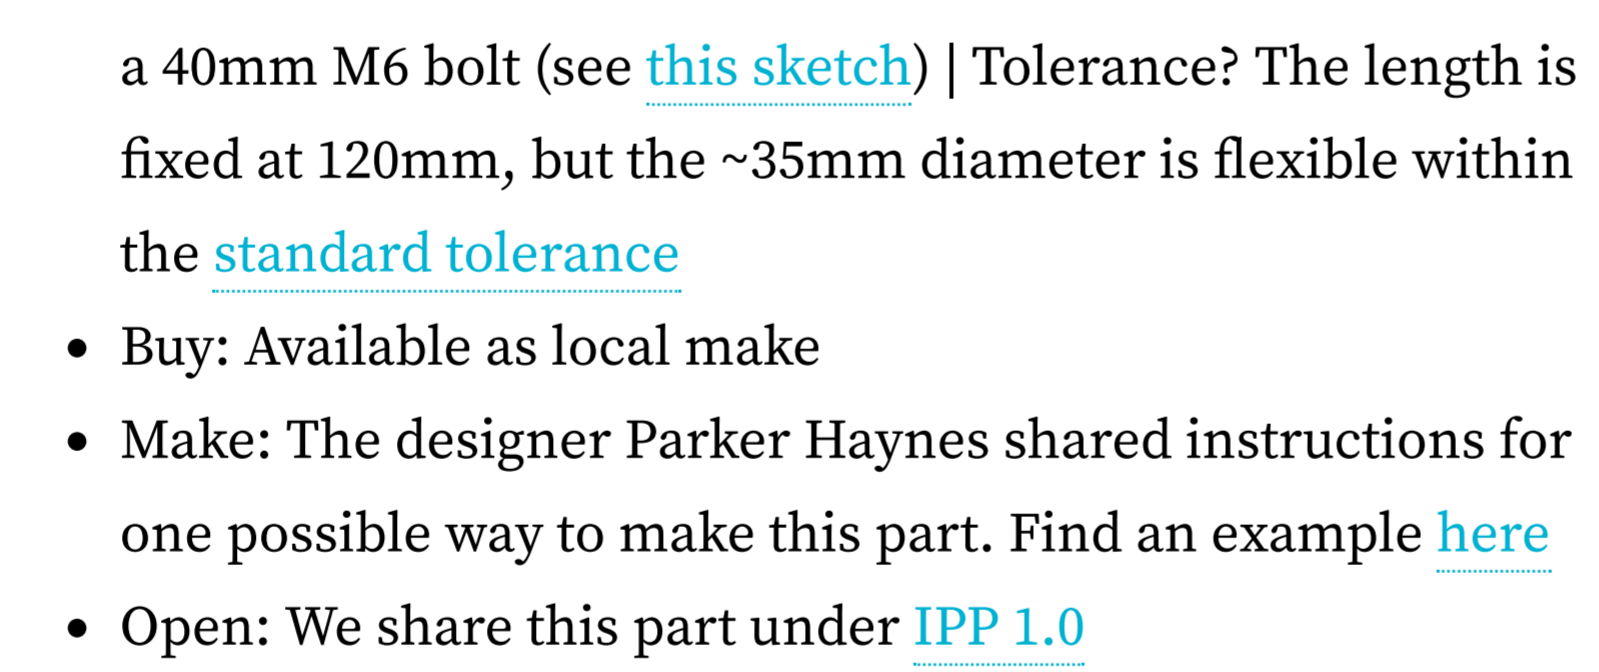

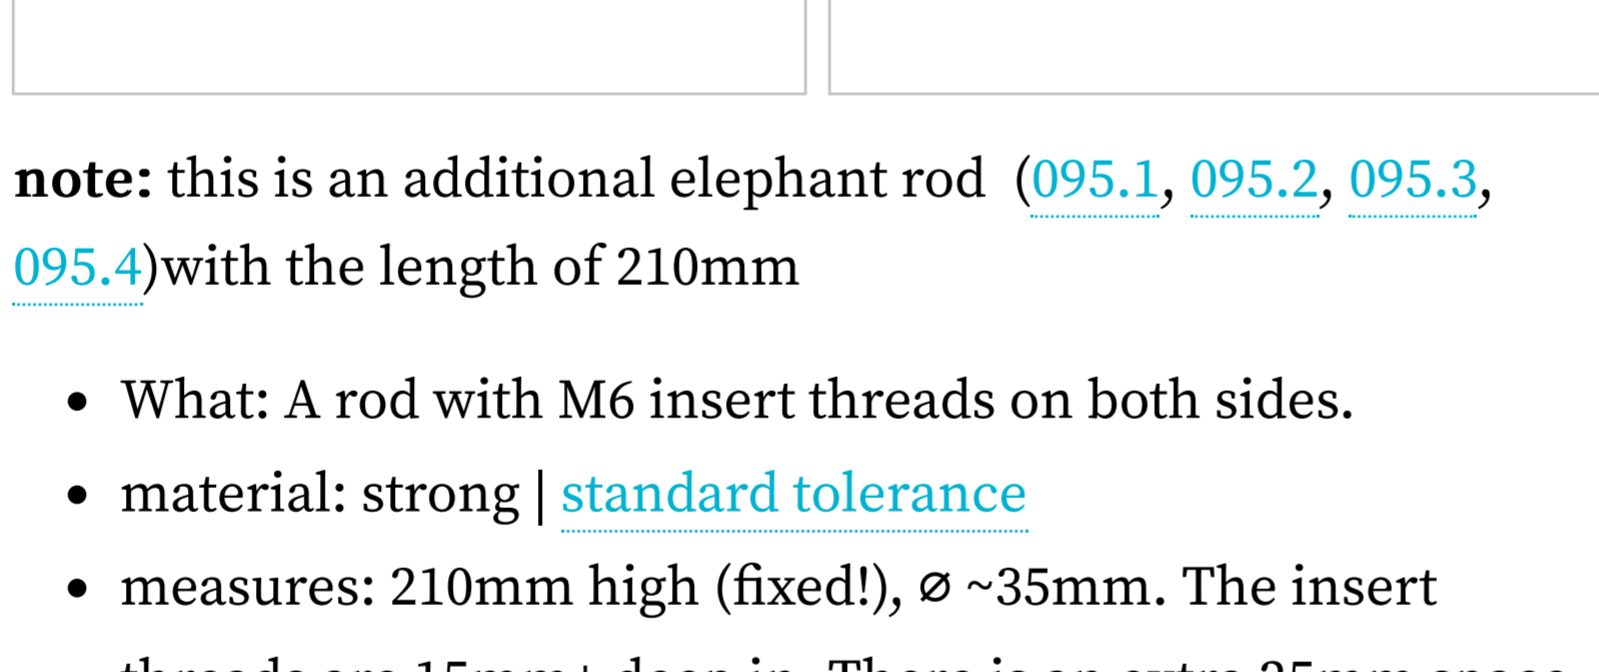

note: this is an additional elephant rod ([095.1](#), [095.2](#), [095.3](#), [095.4](#)) with the length of 210mm

- What: A rod with M6 insert threads on both sides.
- material: strong | [standard tolerance](#)
- measures: 210mm high (fixed!), ø ~35mm. The insert threads are 15mm+ deep in. There is an extra 25mm space for a bolt after the insert thread. So in total there is room for a 40mm M6 bolt (see [this sketch](#)) | Tolerance? The length is fixed at 120mm, but the ~35mm diameter is flexible within the [standard tolerance](#)
- Buy: Available as local make
- Make: The designer Parker Haynes shared instructions for one possible way to make this part. Find an example [here](#)
- Open: We share this part under [IPP 1.0](#)

*

3

600mm bar

note: this is part [076.1](#) with one additional hole

- What is it: A rail
- material: strong | [standard tolerance](#)
- measures: ~ 600 x 30 x 16 mm | [standard tolerance](#)
- holes: [Ikego grid](#), 5 holes ø 6mm, for hole distribution see drawing
- Buy: Available as local make
- Open: We share this part under [IPP 1.0](#)

all the other parts are already part of the Ikego parts catalog (see above ↑)
